

Coding Set 1

▣ **Largest of Three Numbers**

Take three integers as input and print the largest number.

▣ **Check Prime Number**

Input a positive integer and determine whether it is prime or not.

▣ **Factorial of a Number**

Find the factorial of a given number using a loop.

▣ **Reverse a Number**

Input an integer and print its reverse.

▣ **Palindrome Number**

Check whether a given number is a palindrome.

▣ **Sum of Digits**

Find the sum of all digits of a given number.

▣ **Fibonacci Series**

Print the first N terms of the Fibonacci sequence.

▣ **Find Maximum Element in an Array**

Input N elements into an array and find the largest element.

▣ **Find Minimum Element in an Array**

Input N elements into an array and find the smallest element.

▣ **Linear Search**

Search for a given element in an array and print its index if found.

▣ **Count Occurrences of an Element**

Count how many times a given element appears in an array.

▣ **Second Largest Element**

Find the second largest element in an array without sorting the array.

▣ **Array Reversal**

Reverse all elements of an array in-place.

▣ **Binary Search**

Given a sorted array, search for an element using Binary Search.

▣ **Remove Duplicate Elements**

Remove duplicate values from an array and print the resulting array.
